

OUR NEW BOILER IS NAMED "TIGER"

To download a copy of this sheet or see a short video, find it here:
<http://www.williamhunter.co.uk/ZINC/poolinformation.htm>

Our mastermind for this project was Duncan Faulkes,
who is our expert to answer your detailed questions.
email: duncan@faulkes.eu

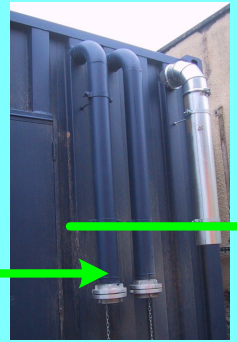

Our boiler was funded by:

This is our boiler's stomach - Ouch! hot!

Our boiler breathes out here - the CO₂ is absorbed by special trees which are later harvested to provide us with fresh pellets as feed

Pellet delivery

We all love feeding our new boiler
(boiler bran)

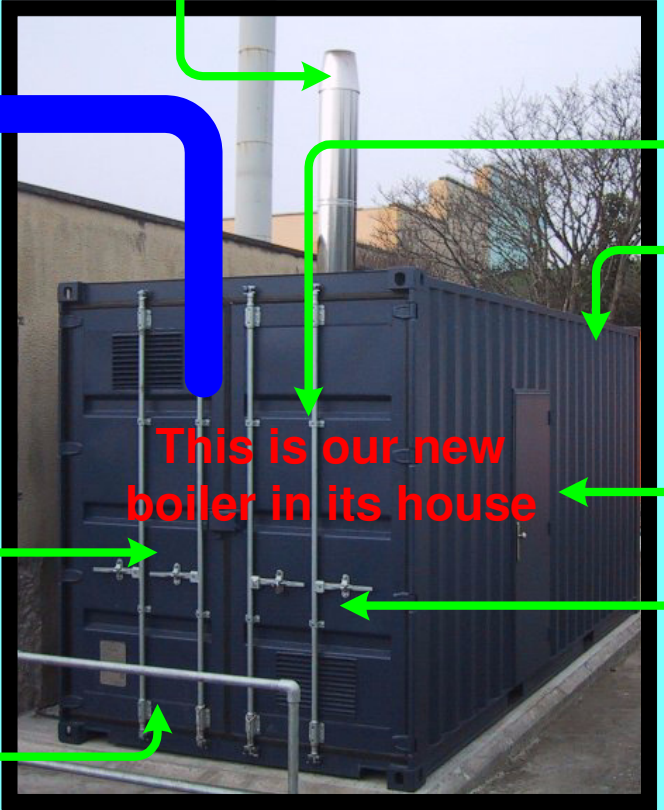

We can talk to our boiler here

This is the larder where our boiler's food is stored

OUR BOILER GIVES US HOT WATER FOR THE POOL

The boiler does not have much waste but here is its portalo

This is our new boiler in its house

This is our boiler's feeding system: it is quite fiddly because each mouthful is chewed lots and lots

These are our boiler's guts
